

MaxBulk Mailer 4.3 Release

Maxprog is proud to present a new release of MaxBulk Mailer, new version 4.3, available now in English, German, French, Japanese, Italian and Spanish on Maxprog website with several interesting improvements, new features and bug fixes.

Los Angeles, CA (PRWEB) October 6, 2005 -- Maxprog is proud to present a new release of MaxBulk Mailer, new version 4.3, available now in English, German, French, Japanese, Italian and Spanish on Maxprog website with several interesting improvements, new features and bug fixes.

MaxBulk Mailer is an email-merge solution for Macintosh and Windows that supports plain text, HTML and rich text formats including optional plain text alternative and attachments. It includes document and contact management, support for multiple lists and multiple accounts with POP, APOP and ESMTP authentication, SSL, groups, mySQL and postgreSQL imports, unicode UTF-8 support, 32 encoding for virtually any language and hundreds of exclusive features. MaxBulk Mailer is available in English, German, French, Japanese, Italian and Spanish for Mac OS 9, Mac OS X and Windows Me/2000/XP.

Maxprog has created the ultimate tool for all of your email marketing needs. MaxBulk Mailer allows you to design and send professional looking emails to your customers and prospects for as little as fractions of a penny...directly from your own desktop. MaxBulk Mailer is a powerful mail-merge tool for Macintosh that allows you to send out customized press releases, price lists and any kind of text or HTML documents to your customers. MaxBulk Mailer is fast, fully customizable and very easy to use. MaxBulk Mailer handles plain text, HTML and styled text documents and gives full support for attachments. Here is a breakthrough tool from Maxprog that will allow you to increase your profits, strengthen your customer service and send your messages to new markets.

With MaxBulk Mailer you will create, manage and send your own powerful, personalized marketing message to your customers and potential customers. MaxBulk Mailer is a software tool that you purchase once, no need to pay on a per-email basis to submission services. Now your promotional messages will jump off the screen with HTML mail! MaxBulk Mailer HTML allows you to include graphics, fonts and colors turning your messages into professional online brochures. Any user can utilize their full lists of contact information with MaxBulk Mailer. You'll be able to reach everyone in your database without worrying about integration or compatibility issues.
