Los Angeles, CA ([PRWeb](#)) November 16, 2007 -- Maxprog is proud to present a new release of iCash, new version 4.0, available now in English, German, French, Swedish, Italian, Dutch, Russian, Spanish and Portuguese on Maxprog website with a lot of new features and improvements like budgeting support, new overview panel navigator and flat lists, Bar and Pie charts and currency update thru the internet to name a few.

Maxprog's iCash is a \$39 Personal Finance and money manager software designed to track incomes, expenses, credits, debts and banks transactions. It offers unlimited categories, multiple accounts creation, multiple currencies, a SQL backend engine, password protection, export/import routines, search functions, and drag & drop support. (Mac OS X and Windows) (Available in English, German, French, Swedish, Italian, Dutch, Russian, Spanish and Portuguese)

iCash is a Personal Finance software, a tool intended to control your money, keeping track of incomes, expenses, credits, debts and Banks transactions for you. As simple as creating the accounts you need and move money between them. You don't even need to know about accounting or even care about it.

iCash can serve several small accounting needs for either private users, or clubs, associations, self-employed, small businesses or simply to be used at home, making keeping track of incomes, expenses and Bank transactions a snap. With a few clicks you can begin creating accounts and making transactions in minutes.

iCash is versatile and user-friendly. For this reason it doesn't use the principle of double-entry bookkeeping making it much easier to be used by people with very little or no accounting knowledge at all. Simply create accounts for all your expenses, incomes, Banks...and start moving money between them. iCash will then allow you to find out where all your money comes from and where it goes. All accounts are well organized according to user-defined categories and built-in types so reports can be tailored to include all records or only ones meeting specified criteria. iCash also allows you to have as many money manager documents as necessary so you can control almost anything from Clubs, associations, home and so on at the same time.

MAX Programming, LLC. also known as Maxprog® is a privately held company based in Spain dedicated to Macintosh and Windows software development. MAX Programming mainly develops and markets Internet, communication and database tools. MAX Programming is unique in its approach to business, especially when it comes to customer care and satisfaction. In fact, our goal is to give each customer the utmost in personal attention and service.

MAX Programming, LLC was founded in the early nineties by French-born programmer Stanley R. Busk, after over 15 years of experience in the high-tech networking industry and computer software development, now Chief Executive Officer of the company. Since its creation, MAX Programming has built firm business relations with thousands of clients from over 117 countries with products localized in up to 10 different languages.

Full-featured demos of MAX Programming Software products are available via the company's web site:  
<http://www.maxprog.com/>

- Fast Import and Export of Categories, Accounts and Transactions. (OFX, QIF, CSV)
- Powerful SQL database engine with auto-backup protection.
- Multi-document interface with password protection.
- Native versions for Mac OS X and Windows.

#### What's new

- Budgeting support: iCash v4 introduces Budgeting, a feature designed to replace cumbersome and error-prone spreadsheets. Indeed, it is now possible to take advantage of the data you have been typing in iCash so far in order to create a budget.
- Overview Panel navigation: We have brought iCash Overview panel to a whole new level giving you the ability to browse thru types and categories as if you were handling folders on your desktop.
- Overview Panel flat list display: The Overview panel finally offers the possibility to also display flat lists. In fact, you can now set iCash to show a flat list of accounts from multiple categories and/or types at once rather than hierarchically organized as it was done so far.
- Currency update thru the Internet: If you are connected to the internet, it is now easier than ever to keep all your currency exchange rates updated.
- Support for Bar and Pie charts: The Toolbar pie chart icon has finally been honored. Now you can create both bar and pie charts in addition to default line chart. Line and bar charts are intended to display the evolution of an account or a group of accounts over the time whilst the pie chart simply shows ratios.

See enclosed documentation to find out more about what iCash can do for you. Thanks for supporting iCash.
